

PRESS RELEASE

B-25 Mitchell

Fly a WWII warhorse!

In the Pacific, the B-25 Mitchell was America's response to the attack on Pearl Harbor. They were the first American bombers to strike mainland Japan and they hit troops, ships, supply routes, and depots all over the world. In our model, twin counter-rotating props and twin rudders deliver stable flights with good control authority and a steerable nose wheel makes ground control a breeze. With both RTF and Tx-R versions available, you can be piloting a sleek, scale replica of "Heavenly Body" within moments of charging the battery.

Features:

- Impressive micro scale looks
- Modeled after "Heavenly Body"
- Smooth, stable flight characteristics
- Tactic 4-channel SLT radio system with built-in battery charger (RTF only)
- 1S LiPo flight battery
- 5 "AA" batteries
- LiPo charger (Tx-R only)

Wingspan: 21.7 in (552 mm)
Weight: 2.7-2.9 oz (77-82 g)
Length: 17.2in (437mm)
Wing Area: 63.6 in² (4.1dm²)
Wing Loading: 6.1-6.6 oz/ft² (19-20g/dm²)
RTF Requires: Nothing
Tx-R Requires: 4-channel SLT-compatible transmitter

Extensive use of clear plastic for the cockpit glass and gun turrets enables maximum realism and detail for a model of this size.

Supreme control authority in the air and improved scale looks on the ground with working twin rudders, just like the original.

Available: Spring 2016
