

## PRESS RELEASE

### New Drone Series LiPos: power for sport, photography and FPV racing!

## DRONE SERIES

FlightPower introduces Drone Series LiPos, one of the most complete and comprehensive lines of LiPos ever created specifically for the needs of drones and drone pilots.

The 23-pack selection includes 3S and 4S packs with 30C or 70C discharge rates for FPV racing drones, as well as a wide range of 10C packs designed for large and/or camera equipped drones. Capacities ranging up to 16,000mAh make them ideal for longer flights and most of today's most popular drones. The line includes a wide array of packs with the JST XH balancing plug and XT60 discharge connector, plus a modular pack designed specifically for the DJI Phantom 2.

Like all FlightPower packs, Drone Series packs start with the best cells money can buy. Strict quality control and cell matching standards make cells even more dependable.

Cell tabs and balancing plug connections are ultrasonically welded for absolute reliability and strength. The result are premium packs that deliver like-new performance even after being cycled 100, 200 or even 300 times.

Adding top-notch customer support and an industry-leading 2-year, limited warranty on all packs helps explain why FlightPower is considered the #1 battery line in the world.
