

3PV 2.4GHz Surface Radio

A super-fast system for demanding drivers.

Many of the features incorporated into the 3PV are the kinds of advantages racers are looking for in a top-of-the-line radio. It's lightweight and comfortable to hold, easy to program, and boasts an amazingly quick response rate that can be a real difference-maker on race day. The 3PV also offers FHSS, S-FHSS and T-FHSS protocols, making it one of R/C's most versatile surface systems, and it's available with a choice of receivers. Enthusiasts wanting to monitor receiver voltage can opt for the 3PV with R304SB telemetry receiver. Bashers and racers not requiring telemetry functions can choose the 3PV with the high-voltage R203GF receiver.

Features:

- FHSS/S-FHSS/T-FHSS* protocols
- 10-model memory
- Model Name and Reset
- Low Battery Alarm
- Steering, Throttle and Sub trims
- Steering Dual Rates
- Steering, Throttle and Channel 3 & 4 End Point Adjustment
- 4WS/Brake Mixing
- Steering, Throttle and Channel 3 & 4 Servo Reversing
- Steering and Throttle Exponential
- Throttle Fail Safe
- Auto Power-off after 10 minutes

*T-FHSS available only with R304SB receiver

Steering, Throttle and Steering Dual Rate digital trims are conveniently positioned around the wheel for easy access. The nearby switch is for programming 3rd channel functions if needed.
