

Futaba 4PV 4-Channel Computer Surface Radio System

4PV

4-Channel Computer Surface Radio System

Be more

Some RCers are born to bash, others are driven to race. One radio is designed to bring out your best. Featuring T-FHSS protocol the 4PV provides live telemetry data of your vehicle's temperature, RPM, receiver and external voltage levels. Audible alerts via audio jack allow you to focus on driving while staying in the know.

With adjustable throttle position, throttle tension, steering tension and 5-optional accessories the 4PV offers customizable ergonomics to make the radio uniquely yours.

The 4PV is compatible with two T-FHSS receivers and six S-FHSS receivers and is updateable via the CIU-2 and CIU-3 interface ensuring your 4PV keeps up to date with Futaba's latest technological innovations. To get the most out of your vehicle and 4PV use the included R304SB T-FHSS receiver. Visit futabarc.com for more information.
