

S9373SV S.Bus2 HV High-Torque Servo

Top-end torque, for 1/8 scale competition

Ideal for buggies and other 1/8 scale competitors, the S9373SV S.Bus2 HV high-torque servo delivers massive muscle and superior speeds on command.

A full metal case helps dissipate heat. Titanium metal gearing provides durability, and dual bearings result in super-smooth operation.

The S9373SV is also programmable, with many different, adjustable parameter settings. With S-Link servo programming software, users can customize servo travel, torque, smoothness and more, to satisfy any application or personal preference.

You can download S-Link servo programming software at futabarc.com/software-updates.html. Also, check out our updated Servo Wizard to match the right servos for your needs at futabarc.com/servos/servo-wizard.php.

Torque @ 7.4V: 342 oz-in (24.6 kg-cm)
Speed @ 7.4V: 0.06 sec/60°

Size: 1.6 x 0.8 x 1.5 in (41 x 21 x 37 mm)
Weight: 2.7 oz (76 g)
