

SBS-01S Servo Sensor S.Bus2

The ideal way to keep tabs on your servos

Telemetry is a tremendous asset for radio control modelers, and Futaba is expanding their telemetry line to include a sensor for monitoring S.Bus2 servos.

The SBS-01S Servo Sensor displays the in-flight current, operating angle and internal temperature for up to two S.Bus2 servos. It also sends an alarm if the pilot forgets to turn off the receiver. Using a telemetry-equipped transmitter, an informative log file for each servo can be created. Simply download the Telemetry Log Converter from futabarc.com/software-updates.html, and the log file can be converted to a CSV file. *NOTE: the SBS-01S Servo Sensor is compatible only with 18MZ and 18SZ systems.* Visit futabarc.com for details.

Specifications

Length: 10 in (255 mm)

Weight: 0.24 oz (6.9 g)

Voltage: DC 3.7V-7.4V

Available: Now

Stock Number	Description	Advertised Price
FUTM0858	SBS-01S Servo Sensor S.Bus2.....	\$49.99
