

RF-X Update – Beta Release

Green Grass Flatlands flying site

Fan favorite features are coming to the world of RF-X

We're committed to making RealFlight the ultimate flight simulator on the market. We rolled out a brand new version with improved graphics, unbeatable physics, and an open world concept... but we're not done yet! The RF-X Update Beta Release is here and it's loaded with additional features:

Vehicle Editor

- Design, redesign, and modify existing aircraft to suit your tastes with the vehicle editor (available separately).
- Familiar toolkits similar to previous versions and compatibility with most older swap files.
- Supports open source FBX files; compatible with 3D Studio Max.
- 5X as many polys supported as ever before.

Performance Enhancements

- Improved frame rates and smoother operation throughout.
- RF-X now starts in "Full-Screen" with a "desktop" option.
- Green Grass Flatlands flying site for easy, less graphics-intensive flying.

Best of all, we're far from done! Keep checking back for updates, upgrades, and downloadable content at RealFlight.com.
