

H107C+ X4 Ready-To-Fly Camera Drone

NOTE: Flown as equipped, the H107C+ does not need to be registered with the FAA.

FEATURES:

- The 6-axis flight control system features adjustable gyro sensitivity
- Altitude Hold makes learning to fly much easier
- Multiple flight modes allow pilots to fly at their particular comfort level
- True Direction function moves the drone in the same direction as the sticks
- Perform flips and rolls with just the push of a button
- A built-in memory card slot lets you store videos for sharing*
- The battery “snaps” into place for quick installation
- Bright LED lights aid in orientation and allow for night flying
- Capable of flying both indoors and outdoors
- A 3.7V 530mAh LiPo battery and USB charge cord are included
- Measures 113 mm (4.45”) across diagonally

*Memory card sold separately.

More drone features for less money

An incredible value in a camera-equipped UAV, the H107C+ X4 has many of the features pilots look for in a drone. It flies smooth and steady, yet can do flips on command. The camera takes sharp videos and still photos, which can be uploaded. And everything you need to get airborne is inside, including a LiPo flight battery.

The H107C+’s controller is lightweight and shaped to fit a pilot’s hands for maximum comfort and control.
