

## HPI Jumpshot ST 2WD EP Stadium Truck RTR

### Get a jump on the stadium racing competition!

Durable and easy to drive, HPI's 1/10 scale Jumpshot ST delivers fast, stunt-filled stadium racing excitement right out of the box. Its extra-wide stance, double-wishbone suspension and big oil shocks provide stable handling at high speeds over a wide variety of surface conditions. Push the throttle and a 15-turn motor lays on the power to scream down straights, catch air and come down with dirt flying!

The Jumpshot ST has been thoroughly engineered to withstand aggressive action. Its adjustable, modular design shields onboard equipment while also simplifying maintenance. The compact, enclosed drivetrain maximizes durability and efficiency. Waterproof electronics and all-terrain tires defy the elements when racing under adverse conditions.

HPI includes a 7-cell NiMH battery — or, you can install your own 2S LiPo pack for increased power and run time. For more on the Jumpshot ST, check it out on HPI's web page at [hpiracing.com](http://hpiracing.com).
