OSMG1996 Speed T1202 1/10 Scale Touring Car Engine \$479.99

Features

- Thicker cylinder flange transfers heat created by explosion effectively to the cooling head
- More powerful low-to-middle range torque
- Greater fuel efficiency, so you stay in the action longer
- Lower center of gravity, for better handling
- Race-proven Speed innovations such as a tungsten weighted crank shaft with diamond-like coating and silicon potting
- Low profile carburetor restrictor enables quicker throttle response from low to top
- Lighter piston performs better over rpm range without hesitation

Specifications
