

RISE RXS255 Extreme Speed FPV Racer

The RISE RXS255 is designed for full-throttle FPV racing out of the box. Each 4S ESC is pre-loaded with BLHeli firmware and OneShot software for “locked-in” precision and agility.

An adjustable FPV camera, video transmitter and cloverleaf antenna are included—just add a monitor or goggles and fly. Check it out at explore-rise.com!

The RXS255 features a modular design with “wireless” arms, which helps make it extra-tough and extra-light.

Features

- 4S ESCs with BLHeli, OneShot and active braking
- 1000TVL CMOS FPV camera with 0-45° mobility
- 200mW video transmitter and cloverleaf antenna
- (4) 5x4.5” bullnose props
