

## Tactic 5.8GHz FPV Equipment

### Immerse yourself in the action

Perfect for FPV drone racing and aerial photography, **FPV-G1 Goggles** are a high-tech, low-cost way to immerse yourself in the action. Just add the FPV-RM2 monitor or your favorite mobile device to get the best possible experience. They're compatible with smartphones of virtually any size and Wi-Fi camera drones.

The **FPV-RM2 Monitor** is the ideal accessory for our FPV-G1 Goggles, whether you're interested in radio-control models or "eye-in-the-sky" photography. A 4.3" backlit color LCD screen gives you great picture quality, while the **40-channel, 5-band 5.8GHz receiver** is optimized for pro FPV racing. The auto-scan feature makes it easy to find the clearest channel for FPV viewing. A micro memory card slot lets you store, edit and upload your videos in the highest quality, while a 1.5 hour run time and USB charge port add to the convenience.

For the ultimate in one-stop shopping, choose the **FPV-G1/FPV-RM2 Combo**, which pairs both products for an unbeatable value! Check them out at [tacticrc.com/fpv](http://tacticrc.com/fpv) now.
