

Tactic FPV Wrist Monitor with 5.8GHz Rx

A new way to view FPV

Just secure the small, lightweight monitor to your wrist. Then you're ready to enjoy live video streaming from the FPV Wrist Monitor's built-in 5.8GHz receiver to the 2-inch LCD screen. Change channels, and bands with the press of a button.

With 32 channels, the Wrist Monitor can access the video feeds coming from cameras mounted on aircraft, cars, boats and more. Even when you're only observing from the sidelines, you'll be more immersed in the action than ever — seeing the same point of view as the driver or pilot watching from their headset!

For more details, see the web page at tacticrc.com/fpv.

TACZ5160 FPV Wrist Monitor with 5.8GHz Rx \$49.99
