

4-wheel driving made easier

DEX410v5

1/10 Scale 4WD Electric Buggy Kit

Team Durango engineers have designed the DEX410v5 for more speed, handling and durability than ever. Innovations include a Multi-Axle Driveshaft, an industry first. It lets you “square up” the vehicle’s power by changing the driveshaft’s length. Use the included medium-length 60 mm driveshaft, or select a short 57.5 mm or long 62.5 mm driveshaft (sold separately) to customize further. With its vast array of high-end upgrades, the DEX410v5 is sure to take you to the winner’s circle!

Specifications:

Length: 16 in (407 mm)

Width: 9.9 in (250 mm)

Wheelbase: 11.38-11.7 in (289-298 mm)

Requires: 2-channel radio, motor, ESC, steering servo, pinion gear, tires, shock oil, 2S LiPo battery and compatible charger

- Enjoy smoother power delivery and better traction with the DEX410v5’s center differential with adjustable slipper clutch
- A longer wheelbase and wider chassis creates consistent stability in all conditions
- Revised rear geometry adds rear grip, which translates into more forgiveness
- Easy Mesh system lets you reposition the motor without optional parts
- Accepts standard 12 mm and Team Durango wheels
- Chassis design lets you use saddle and shorty packs in multiple configurations
