

## Team Futaba Talent Grows With A.C. Glenn

### National Champion Brings Unique Experience to the Team

**Champaign, IL – September 2017** – For new Team Futaba pilot A.C. Glenn, aviation and RC models have always meant more than fun. He credits his father for sparking his interest when he was only five years old. “It was our way of connecting,” A.C. says, “and it turned into a lifelong hobby.” A.C. also counts one of the legendary Tuskegee airmen as a childhood mentor.

Now age 28, A.C. has flown RC aircraft for 22 years and participated in competitions for a majority of that time. When not piloting models for pleasure, he has also been involved with their development and use for intelligence and defense contracts. Working remotely from Yuma, Arizona, for the North Eastern Aeronautical Company, A.C. controlled drones in Afghanistan that could detect roadside bombs from 12,000 feet in the air.

A.C. performs at RC flying events and seminars around the world. He’s been a regular in pattern competitions since 1999 and in F3A since 2007. He was a U.S. F3A finalist each year from 2011 to 2016 and F3A Pattern National Champion in 2015. The 30th F3A World Championship arrives in early November — and A.C. looks forward to joining Team Futaba in Argentina and bringing home the gold.

Long before becoming a Team member, A.C. preferred flying with Futaba equipment. Both of his National Championships were won using Futaba systems. His primary transmitter is the Futaba 18SZ, with the BLS171 servo and 7008SB receiver completing his system of choice.

Please join Futaba in welcoming A.C. to the team. Watch for him at events throughout the season!

**About Hobbico:** “Love Your Hobby” is Hobbico. Innovative products, renowned brands and passionate customer support make us a leader in the RC world. We help you find the perfect hobby when you’re looking for real life adventures! For more information, visit [hobbico.com](http://hobbico.com).
