

## Futaba® 7PX 2.4GHz T-FHSS Super Response 7-Channel System

### Lead the Way

The 7PX leads the way to a new revolution in surface control, thanks to Super Response Mode, full telemetry capability and the R334SBS diversity receiver!

T-FHSS SR Super Response makes the 7PX the fastest Futaba radio yet, to give drivers a more “locked-in” feel while racing. In addition, the 7PX offers the T-FHSS protocol, which allows full telemetry capability. This radio is also compatible with S-FHSS and FASST protocols, expanding receiver options tenfold.

The innovations don't stop there. A 4.3” backlit LCD touch screen lets drivers access key features instantly, via intuitively designed menus. When it comes to features, an R334SBS diversity receiver, 40-model memory and updateable software are just the tip of the iceberg. Check it out at [futabarc.com](http://futabarc.com).

### Features

- Features the exciting new T-FHSS SR Super Response mode that offers the fastest, most accurate control yet
- Also compatible with T-FHSS, S-FHSS and FASST protocols, so you can select the preferred protocol or RF for each vehicle
- The large, backlit 4.3” LCD touch screen allows for easy viewing
- Full telemetry capability, with data relayed on screen or audibly through the built-in speakers or through headphones (sold separately)
- An R334SBS 2.4GHz diversity receiver, 40-model memory and five programmable mixes are just a few more examples of the 7PX's advanced technology

### Specifications

**Type:** 7-Channel FASST/S-FHSS/T-FHSS/T-FHSS SR

**Voltage:** 6-7.4V

**Weight:** 20.5 oz (580 g)

**Requires:** LiFe 2100mAh 6.6V (FUTM1491)

**FUTK4908** Futaba 7PX T-FHSS Super Response 7-Channel System \$599.99
