

## HB Racing RGT8 1/8 GT Class Nitro On-Road Race Kit

Shown with engine, servos,  
tires and wheels, not included.

### World Champion DNA

There's nothing quite like GT Class racing — and if you want to take the checkered flag you should go with a car that's been there and done that. That would be the RGT8. HB Racing took the highly successful D815 buggy platform and modified it for on-road domination — and the end result is primed to blow your mind.

From bumper to bumper the RGT8 is sleek, tough and all about winning. To find out more about this 1/8 scale powerhouse visit [hbracing.com](http://hbracing.com).

HBSC4616 RGT8 1/8 GT Class Nitro On-Road Race Kit \$639.99

### Features

- The same drivetrain, radio box and front and rear hubs as the D815
- Chassis is adjustable to meet a variety of track conditions
- Durable steel pinion gears
- 5 mm carbon fiber shock towers
- Suspension arms molded from durable plastic
- Shortened Big Bore shock assemblies, for less travel and lower CG
- Shares many high-performance replacement and option parts with the D815
