

HPI Racing® Kraken Baja 5B RTRs

HPI and Kraken RC bring you the best of both worlds!

Experience the Baja 5B like never before—fully loaded and wrapped in a hard-core Kraken Roll cage, just like the full scale racers.

Fit a fully built and painted Baja 5B with a Kraken RC roll cage and you get one of the coolest, meanest RC vehicles around. A classic sand rail and a TSK-b Class 1 are both available with a fully functional polymer roll cage and polycarbonate body panels from Kraken RC.

Either vehicle delivers the pounding power of the Baja 5B—equipped with a driven HPI Fuelie K26 engine and ready to take on the sands. They're also armed with the latest heavy duty suspension and drivetrain components for maximum off-roading.
