

REEF RACER 2TM

RADIO-CONTROLLED READY-TO-RUN ELECTRIC MINI VEE

DIVE INTO REAL OFFSHORE ACTION!

The super-quick vee-hull Reef Racer 2 comes complete and ready to run, with a durable hull and prepainted hatch, with factory-applied decals — there's even a painted driver figure! The Reef Racer 2 offers quick response and "turn-on-a-dime" handling — even at top speeds. Easily removable watertight covers that protect the electronics equipment and the Reef Racer 2's self-righting hull design ensure non-stop action! With its amazing maneuverability, the Reef Racer 2 is perfect for swimming pools, small ponds and lakes!

SIX DIFFERENT COLORS

The Reef Racer 2 is available in six different colors and frequencies, making it a great boat to race with your friends!

HCAB14**

Length: 15 in (380mm)

Beam: 5.3 in (145mm)

Includes: 2-channel pistol grip radio w/1 mini servo and ESC, 7.2V 1100mAh NiMH battery pack and 30-minute 12V field charger.

Requires: 8 "AA" batteries for the transmitter.

Includes a powerful, water-cooled 380-size electric motor for high speed action.

There's no stop in the action with the Reef Racer 2's unique self-righting design.

Features a hobby-quality 2-channel radio that can be converted from right- to left-hand use. Also includes a NiMH rechargeable battery and 30-minute charger.

It's a hit — for fast, easy racing fun!

HCAB10**
Length: 24 in (610mm)
Beam: 8.75 in (220mm)
Requires: 6-7 cell battery, charger & 8 "AA" batteries

There's a right tool for every job — and when the job is diving straight into offshore action, the only tool you need is the Hammer RTR. No assembly or finishing is needed, and on-board electronics come already installed. It's an easy way to break into R/C boating...and a rush for experienced skippers, too!

- Radio and drive equipment come already installed — from the rudder servo and reverse-equipped electronic speed control to the water-cooled, 550-size electric motor.
- The waterproof radio compartment features a screw-down cover that allows easy access to the on-board radio gear.
- Realistic deep vee racer looks — complete with twin cockpits.
- Six dazzling hull colors to choose from, each with decals included for creating the eye-catching trim scheme.

Authentically detailed — generously equipped!

HCAB59**
Length: 30.25 in (770mm)
Beam: 9.75 in (250mm)
Height: 19 in (485mm)
Requires: 6-7 cell 7.2V NiCd or NiMH battery, 10 "AA" alkaline batteries, charger

It's so realistic that you almost expect to see smoke streaming from the stack and hear the massive engines churning the props. From the rubber bumper on the hull to the tow loop on the stern, the Atlantic Harbor Tugboat features extraordinary detailing that is normally found only on a kit you've built yourself. But this tugboat is completely factory-assembled, and can be on the job just moments after you take it out of the box!

- Already assembled and completely equipped! Includes radio, motor, reversible ESC, running lights and display stand.
- Rich in real-life details! Includes working lights on the cabin and mast, twin anchors in the bow and real rubber fenders over the rails.
- The strong fiberglass hull offers a glossy factory finish on the outside and factory-installed running gear inside.
- The powerful 550 motor and direct drive system provide scale-like speed and power.
