

# **SUPERVEE 27<sup>TM</sup>** **BRUSHLESS**

**RADIO-CONTROLLED READY-TO-RUN BRUSHLESS FAST ELECTRIC RACING BOAT**

## **Insane Electric Speed and Performance!**

Brushless motors are the hot electric power source in R/C, and AquaCraft is leading the way in boat racing with the SuperVee 27! Right out of the box, the SuperVee 27 boasts the extreme speed and performance to be a worthy competitor in FE (Fast Electric) racing classes. But it's also easy enough for beginners to operate, and it comes completely assembled, so you can be just minutes away from scalding offshore action!

**Water-Cooled B36-56 Brushless Marine Motor**

*It's a first for a Ready-To-Run electric racing boat! Brushless technology is more than just great performance: it's cooler running, higher efficiency, longer run times and lower maintenance!*

**Grimracer<sup>TM</sup> Silicon Water Jacket**

*This durable, lightweight cooling system actually directs water onto the can to more efficiently remove heat from the motor. It's just one of many great GrimRacer boat accessories — see other side for lots more!*

**Water-Cooled, Waterproof 45 amp Brushless ESC**

*It's rare to find an ESC that's water-cooled and waterproof, but this one is! A blue anodized aluminum jacket cycles water around the ESC very efficiently — and the pre-wired plugs are Dean's Ultra plugs.*

by **Futaba<sup>®</sup>**

*Smooth, precise control is courtesy of a quality AquaCraft 2-channel radio made by Futaba<sup>®</sup>. It features throttle and steering trims, a battery status indicator and more — and the steering servo is included.*

*The hull is crafted from durable, lightweight fiberglass that's hand-laid and painted in one of six dazzling colors.*

**AQUB17\*\***  
Length: 27 in (686 mm)  
Width: 8.13 in (205 mm)  
Height: 5.5 in (140 mm)  
RTR Weight (w/o batteries): 4.5 lb (2.04 kg)  
Includes: AquaCraft B36-56 water-cooled brushless motor, brushless 45A ESC, AquaCraft 2-channel radio w/1 servo  
Requires: (8) "AA" batteries for the transmitter; (2) 6-cell battery packs with Deans Ultra connectors

# SUPERVEE 27™

## BRUSHLESS

**RADIO-CONTROLLED READY-TO-RUN BRUSHLESS FAST ELECTRIC RACING BOAT**

The batteries are secured by light-ply holders with hook-and-loop fasteners for quick pack changes. The blue-anodized motor mount is also designed to make motor removal easy.

The servo and linkage are already installed, inside an injection-molded waterproof box with living hinges.

## Equipped with High-Performance GrimRacer hardware!

Michael Zaborowski, the driving force behind the GrimRacer line of premier AquaCraft boat accessories and a 10-year veteran of competitive racing with multiple international, US-1 and President's Cup championships: "GrimRacer is more than just a name — it's an attitude, a personification of my desire to produce the very finest parts and accessories possible. By drawing upon my racing experience, I hope to share my successes with all serious boat modelers."

**Surface Drive Adjustable Strut Assembly**  
Made of machined aluminum, with a .150" flex drive cable and a 3/16" prop shaft that allows for unlimited prop selection.

**Anodized FE Rudder**  
Blue anodized and adjustable, with a built-in water pick-up. The bushed pivot shaft is a performance feature not found on many racing boats.

**FE Turn Fin & Trim Plates**  
The mirror finish on the trim plates not only looks sharp, it will not rust — and because they're stainless steel, they won't flex upon contact with the water. The FE turn fin assembly is made of aluminum and blue anodized.

**Cowl Lock System**  
Boasting the durability of stainless and spring steel, it's a quick, easy and convenient way to attach and remove the hatch — with no loose parts to misplace.
