

# UL-1 SUPERIOR<sup>TM</sup>

Ready-to-Run, Brushless FE Competition Hydroplane

*The racing RTR with all the extras — and no equals!*

There's never been a LiPo-ready hydro with brushless power *and* 2.4GHz technology — until *now*. The UL-1 Superior has been designed in the U.S.A. to deliver today's best in cutting-edge control, brushless performance and competition-quality features!

- Features *high-performance GrimRacer hardware and an optimized-for-brushless hull design developed by Mike "Grimracer" Zaborowski!*
- Includes a *brushless marine motor and ESC custom-designed to meet UL-1 performance requirements.*
- Drive system uses a *standard 0.150" flex drive and 3/16" prop shaft to provide race-quality response and reliability.*

**2.4GHz**

*The 2.4GHz system in the UL-1 is hard to beat for convenience and control. 2.4GHz tech makes it virtually interference-free and supremely dependable — and on-board gear is factory-installed for time-saving ease.*

**NAMBA** **IMPBA**  
Legal for NAMBA AND IMPBA hydroplane racing!
