

# V24 ONE-DESIGN

RADIO-CONTROLLED READY-TO-RUN GASOLINE-POWERED BOAT

**"Big and easy"**  
boating excitement!

Dominate the water...with an offshore racer that's as user-friendly as it gets! At 4-1/2' long, the V24 One-Design Gas Boat skims across wakes with ease, with futuristic looks that make it really stand out. And because it comes Ready-To-Run and is powered by regular gasoline, the V24 is incredibly easy to operate and maintain. It's never been simpler to make a BIG splash in R/C boating!

**HCAB40\*\***

- **Length:** 54 in (1372mm)

- **Width:** 18 in (457mm)

- **Weight (hull only):** 15.6 lb (7.1kg)

- **Includes:** Futaba 2PEKA FM radio w/S3305 servo, Fuji BT-24 gas marine engine, tuned pipe

- **Requires:** 2-cycle oil, standard gasoline, 12 "AA" batteries

**Enjoy the sharper signal clarity of the FM receiver in Futaba's 2PEKA radio!**

- The transmitter is ergonomically designed to be comfortable and easy to hold.
- Features End Point Adjustment (EPA), dual rates and more.
- Comes with two Futaba servos, including an S3305 high-torque servo with metal gears for steering the rudder.

**The Fuji BT-24 delivers massive muscle — and it's pre-installed!**

- Uses regular gasoline and 2-cycle oil.
- Starts easily with the included recoil starter.
- Much simpler to operate than "glow" engines.
- Requires no special equipment such as glow plugs, igniter or starter box.

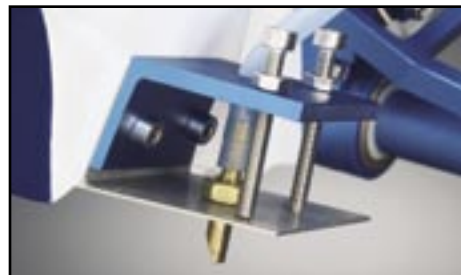

**Gas  
-N-  
Go!**

**Power and control —  
courtesy of top-quality, brand-name components!**

**See reverse side for more of the V24 One-Design's great features!**

The engine's tuned pipe is made of spun aluminum, and comes with a stainless steel support bracket and exhaust header with gas coupler.

The machined, anodized trim tabs have water pickups, and feature stainless steel ride plates with a hex head bolt for making precise adjustments to enhance the boat's handling based on water conditions.

The aerodynamic hull is made of high-quality fiberglass, and is double-stepped to reduce the surface area that actually touches the water. Strakes on the underside help control water deflection. The vertical fin at the rear works with the wings on the sides to keep the boat from flipping over at high speeds.

A Kill Switch is pre-installed that safely cuts engine power, and is enclosed under a waterproof cover.

For the strength necessary to steer a boat this big, the "Super Wedge"™ rudder with water pickup is made of machined, blue-anodized aluminum — as is the control arm and support bracket that attaches the rudder to the transom.

Here's even more blue-anodized, machined aluminum! The Adjustable Surface Drive system lets you alter the angle of the prop to adapt to different water conditions. By installing an optional 3rd channel, you can control this from your radio.

## Replacement Parts & Accessories

### Speed Grease Drive Line Cable Lube

Designed for both electric and glow-fuel boat drive systems, this waterproof blue lubricant reduces friction and wear for flex cable and direct drive systems, with specially formulated "non-sling" properties.

HCAB3000

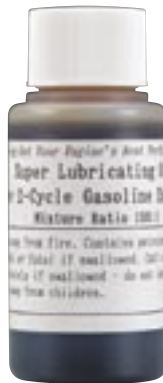

- HCAB6314 Decal Sheet
- HCAB6464 Fiberglass Cowl w/Cowl Lock
- HCAB6502 Engine Isolated Mount 23-30cc
- HCAB6902 Long Neck Gas Boat Fuel Tank 24 oz
- HCAB7008 Push Button Cowl Locks (2)
- HCAB7761 Propeller, Stainless Steel 65mm
- HCAB7859 Flex Cable w/Prop Shaft 1/4
- HCAB7862 Stuffing Tube
- HCAB7863 Engine Flex Cable Collet

### Super Lubricating Oil 250cc

Fuji oil contains additives that prevent mixed fuel inside a dormant engine from clogging the fuel tubes, and its high-performance means a little goes a long way — in fact, it performs very well at a 200:1 gasoline/oil mix!

FJIP9910

- HCAB7864 Prop Shaft for Adj. Surface Drive
- HCAB7865 Drive Dog w/Screw & Washer 1/4"
- HCAB7866 Adjustable Surface Drive 1/4"
- HCAB8200 Tuned Pipe Support Brace
- HCAB8605 Fiberglass Radio Box w/Lid
- HCAB8606 Radio Box Waterproof Tape
- HCAB8708 Machined Aluminum Rudder Blue
- HCAB8709 Rudder Support Assembly Blue
- HCAB8710 Aluminum Rudder Control Arm Blue

### 6V 2/3A 1100mAh NiMH Receiver Pack Std. Hump

This six-volt NiMH pack boasts higher energy density than NiCds and 1100mAh of capacity — and the 2/3A-sized cells allow for this impressive power to be shrink-wrapped in a small, lightweight pack with universal connector.

DTXM2010

- HCAB9011 Servo Linkages w/Connects
- HCAB9043 Adj. Trim Tab w/Water Pickup
- HCAB9260 Water Line Nipples Std.
- HCAG4736 Gas Exhaust Coupler w/Tiewraps
- HCAG5101 Exhaust Header
- HCAG5110 Water Cooled Header
- HCAG5111 Water Cooled Exhaust Flange
- HCAG5911 Tuned Pipe 23cc-30cc
- HCAG6010 Gas Engine Toggle Kill Switch
- HCAZ1003 Instruction Manual
