DURATRAX

THE LEADER IN AWESOME RIC™

EVADERST

EVADERST

QUALITY FEATURES

CUSTOM MULTI-COLOR BODY

Made of light, tough polycarbonate, the Evader's body is rip- and puncture-resistant, as well as cut, trimmed and finished. There are 6 color schemes, each keyed to a different radio frequency!

DURATRAX® 2-CHANNEL PISTOL-GRIP RADIO

Manufactured by Futaba®
The Evader's pistol-grip radio system is made for DuraTrax by Futaba, the world's most respected manufacturer of R/C radio systems. Comfortable to hold, adaptable to individual driving styles and conditions, it's a great to begin — and keep growing — in R/C.

- Adjustable Steering Travel
- Servo reversing
- Steering and throttle trims
- SX-100 Servo
- Recharging jack (for use with optional NiCd batteries)
- LED battery status light
- Removable Antenna

INCLUDES 8 "AA" BATTERIES

20-TURN PHOTON SPEED™ MODIFIED MOTOR

Outperforms stock "throwaways" on-track and off. Offers explosive acceleration to start with and more top-end speed to finish with. An open endbell design makes it easy to clean the commutator and replace brushes and springs — maintenance musts that keep a motor at peak performance.

FACTORY-ASSEMBLED CHASSIS

The Evader ST RTR is fully assembled for ease, and totally equipped for sport racing performance. Learn more about it inside!

BATTERY SHOWN NOT INCLUDED

SPRINT™ ELECTRONIC SPEED CONTROL

Rare in RTRs, an Electronic Speed Control (ESC) is a huge plus in any R/C car or truck. Lighter and more reliable, the Evader's Sprint ESC also replaces the jumpy response of inefficient mechanical controls with smooth acceleration and improved control. Includes reverse, for added mobility and fun.

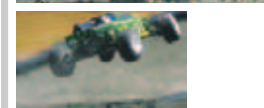

START-UP VIDEO

Gets you on the track in minutes, and provides hands-on maintenance and tuning tips

EVADERST

1:10 SCALE READY-TO-RUN R/C ELECTRIC 2WD STADIUM TRUCK

ADJUSTABLE SLIPPER CLUTCH

Rare on RTRs, but common equipment on racing trucks. Keeps wheelspin under control.

PHOTON SPEED™ MODIFIED MOTOR

20-Turn, Single-Wind Motor – faster than stock.

MOTOR GUARD

Shields the Photon Speed™ motor against damage from rocks, dings and other trucks.

PIN-SPIKE REAR TIRES

Mounted and glued on 1-piece racing rims, and studied with hundreds of tiny rubber "fingers" that produce traction and drive. Supported by foam inserts and installed for ease.

STEEL UNIVERSAL DRIVES

Precision-machined for perfect power delivery. Locks the driveshaft and axle together for greater dependability and efficiency.

QUICK START-UP INSTRUCTIONS

The short-cut around the instruction manual. Goes from start to finish in just 8 short steps.

FIELD BAGS

Heavy-duty nylon, stitched handles and reinforced interiors make these bags rugged — massive size and side pockets make it easy to haul all your R/C stuff at once. Both include zippered tops for security, and shoulder straps for carry-in ease. **Extra-Large** (DTXP2000) is 22.8" x 13" x 11". **Deluxe XL** (DTXP2010), 27" x 14" x 12.5", includes zippered end pouches and a water-resistant bottom.

SPRINT™ ESC W/REVERSE

Speed control that's lighter, smoother, more efficient and more reliable than the mechanical speed controls found in most RTRs. Includes reverse!

COMPLETE BALL BEARING SET (16)

No bushings here. Included to fight friction and wear and increase top speeds.

RAPID-TUNE™ ALUMINUM OIL-FILLED SHOCKS

Stronger than plastic, more effective than springs alone, filled with oil — and installed. Spring tension adjusts simply by turning the aluminum spring collars!

SK100 SERVO

Strength for steering. Installed at the factory.

COUNTERSUNK, COMPOSITE RACING CHASSIS

Countersunk screws prevent "hanging up" on obstacles. "Lipped" to keep dirt out and cleaning to a minimum. Designed with a competition-style sunken centerline channel that turns battery weight into a handling and balancing plus.

Battery shown not included.

BEC RECEIVER

Installed and already connected to the motor, radio and electronic speed control. BEC (Battery Eliminator Circuitry) does away with the need for — and weight of — on-board radio batteries.

ADJUSTABLE BALL DIFFERENTIAL

Top protection for gears, and adjustable for maximum traction and speed on any surface.

ADJUSTABLE STEEL TURNBUCKLES

Makes the Evader's suspension as versatile as some competitive setups. Hexagonal steel design adjusts with the included wrench.

RIBBED FRONT TIRES

Ribbed for aggressive steering action. Foam inserts provide added sidewall support. Assembled and glued at the factory — installed to save time.

DTXD20**

LENGTH: 16.1 in (410mm) WIDTH: 12.9 in (325mm) HEIGHT: 6.6" (170mm)
WEIGHT (W/BODY, BATTERY): 3.6 lb (1625g) WHEELBASE: 11.6 in (285mm) GROUND CLEARANCE: 1.4" (35mm)
F/R TRACKS: 10.5 in (265mm) WHEEL DIAMETER: 2.2 in (55mm) WHEEL WIDTH: 2.0 in (50mm)

GET THE MOST OUT OF YOUR EVADER ST RTR WITH THESE AWESOME ACCESSORIES FROM DURATRAX!

PIT TECH™ DELUXE CAR STAND

A rotating top on this tough polystyrene stand enables it to double as a handy workbench or display showcase. Holes in the top and trays in the base keep shocks, tools and parts within easy reach. Assembles easily, stores flat to save space. DTXC2370.

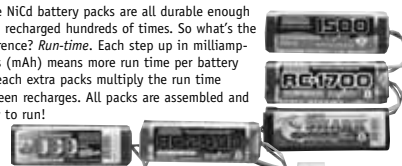

NiCd CONVERSION KIT

Why buy disposable alkaline cells, when you can install Sanyo® NiCds and use them hundreds of times? Recharging is simple: plug the charger into the wall, the plug into your radio — and you're done. Takes only 2-3 hours. DTXP4010

BATTERY PACKS

These NiCd battery packs are all durable enough to be recharged hundreds of times. So what's the difference? *Run-time*. Each step up in milliamp-hours (mAh) means more run time per battery and each extra pack multiplies the run time between recharges. All packs are assembled and ready to run!

INTELLIPEAK™ PULSE CHARGERS

The "smart" IC chip in IntelliPeak Chargers makes sure each battery gets a full (peak) charge, whether it's a NiCd battery, or one of the new NiMH (Nickel-Metal Hydride) packs. IntelliPeak can be used at home or at the track, to charge, discharge or even cycle (charge and discharge) a pack automatically. 1-year warranty. DTXP4100-4130.
