ENGINEERED PERFORMANCE • RACE PROVEN

**HAVOK 15T MODIFIED MOTOR**

No stock motor here; the Evader BX Pro is powered by a 15-turn, double wound modified motor with ball bearings.

**IntelliSpeed.**

Besides smoother, more reliable operation than mechanical controls, the efficient, high-frequency IntelliSpeed ESC offers easy push-button setup of ABS braking and reverse (with lockouts for both), plus programmable traction and more.

**TIRES BY**

**PRO-LINE**

You'll enjoy superior handling and traction with high-grip Pro-Line tires — already glued to the wheels and with foam inserts included.

**CUSTOM MULTI-COLOR BODY**

Choose from six hot colors — each keyed to a different radio frequency — made of tough polycarbonate and already trimmed and painted.

**EVADER BX PRO PREBUILT**

Rather use your own electronics and paint your own body? No problem: the Evader BX Pro Prebuilt has every advantage of the Ready-To-Run...the same factory-assembled ease, graphite parts, Pro-Line tires, etc. — but lowers the price and leaves the radio, motor, ESC and trim scheme choice up to you.
