

S.E.5a

1/5 Scale

DYFA3045
Wingspan: 64 in (1625mm)
Wing Area: 1440 sq in (93dm²)
Weight: 12.0-13.5 lb (5440-6120g)
Wing Loading: 19.2-21.3 oz/sq ft (59-65g/dm²)
Length: 53 in (1345mm)
Requires: 2-stroke .61-1.20 cu in (10.0-19.5cc) or 4-stroke .91-1.20 cu in (15.0-19.5cc) engine, 4-channel radio w/7 or 8 servos (for single or dual elevator servos), propeller, 3+ rolls of Top Flite® Flat MonoKote® covering

Pilot figure, wheels and machine gun shown are not included.

Fly the famous British fighter.

FUN SCALE

It was designed for function rather than form; but what the S.E.5a lacked in appearance, it more than made up for in performance. Fast, sturdy and agile, the S.E.5a was one of the Royal Air Force's most capable combat planes during World War I. And Dynaflite's 1/5 scale model of this history-making aircraft is sure to become a cherished addition to your R/C squadron.

All-wood construction and straightforward assembly combine to create a strong, lightweight plane that builds like a breeze — and flies just like the original. You'll find that this replica of the legendary S.E.5a really lives up to its "Fun Scale" designation!

- **ABS parts include the front and bottom cowl, exhaust pipes and pilot's headrest.**
- **Plenty of space for on-board gear can be found in the roomy radio compartment.**
- **A generous hardware package is supplied, along with decals for re-creating the trim scheme shown.**
- **Flies slow and steady, with the capability for aerobatics typical of that era.**

The all-wood framework and photo-illustrated instructions make for easy and enjoyable assembly. ABS parts do away with tedious shaping work while helping maintain the S.E.5a's scale lines.

The ABS front and bottom cowl can be removed quickly for access to the engine.

The simple strut attachment system eliminates at-the-field hassles — struts bolt onto tabs that are glued to the wings.

The large dimensions of this IMAA-legal kit allow for incredible detail.

Dynaflite®

S.E.5a 1/5 Scale

.61 FX™

Ready to deliver easy starts, enviable reliability and plentiful power, the .61 FX is the high-performance 2-stroke choice. A remote needle valve adds to pilot safety; a ratchet spring and O-ring seal hold settings better against "creep". Other features include dual bearings, increased cooling capacity and a repositionable needle valve and fuel inlet.

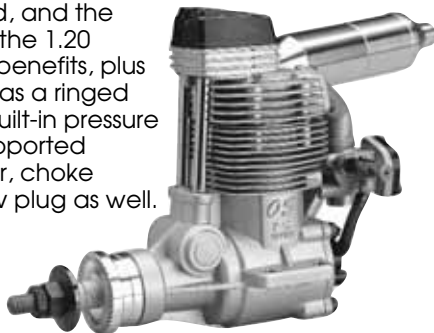

OSMG0561
Displacement: 0.607 cu in (10cc)
Practical rpm: 2,000-17,000
Output: 1.9 bhp @ 16,000 rpm
Weight w/muffler: 23.6 oz (670g)
Includes: muffler, #8 glow plug

FS-120S III Surpass™ w/Pump

Quieter, more realistic sound, and the ability to swing big props — the 1.20 Surpass engine offers these benefits, plus excellent fuel economy. It has a ringed piston design, a carb with built-in pressure regulator, a ball bearing-supported crankshaft, manifold, muffler, choke valve extension and #F glow plug as well.

OSMG0935
Displacement: 1.218 cu in (20cc)
Practical rpm: 2,000-12,000
Output: 2.1 bhp @ 12,000 rpm
Weight w/o muffler: 32.5 oz (921g)
Includes: muffler, manifold, #F glow plug

MONOKOTE® Flat Film Covering

Add even more realism to warbirds with Flat MonoKote colors. It gives a more scale appearance, while retaining all of the advantages of original MonoKote. Available in 6' and 25' rolls.

TOPQ0510 Flat Olive Drab 6'
TOPQ0512 Flat Cream 6'

Other Items Needed to Complete:

- Propeller
- Top Flite MonoKote covering, in White (TOPQ0204), Sky Blue (TOPQ0206) and Dark Red (TOPQ0218)
- 3 Y-harnesses for ailerons (HCAM2751 for Futaba radios)
- Foam Rubber (1/4"-HCAQ1000 or 1/2"-HCAQ1050)
- 10 oz (300cc) fuel tank (GPMQ4104)
- 3' (900mm) standard silicone fuel tubing (GPMQ4131)
- 1/2" double-sided foam mounting tape (GPMQ4440)
- Hook-and-loop material (GPMQ4480)
- Building supplies and finishing and covering tools

Equip your S.E.5a with these excellent accessories.

FS-91 Surpass™ II

The power is undiminished, and the dependability and convenience are greater than ever. Corrosion-resistant plating is featured in critical areas, along with a permanently lubricated, rubber-sealed rear bearing. A reversible carb, with the needle valve and mixture control screw on the same side, offers adjustment and installation ease. Available in pumped and non-pumped versions.

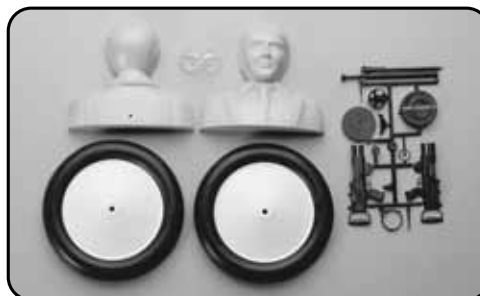

OSMG0890 FS-91 Surpass II w/Pump
OSMG0896 FS-91 Surpass II w/o Pump
Displacement: 0.912 cu in (15cc)
Practical rpm: 2,000-12,000
Output: 1.6 bhp @ 11,000 rpm
Weight w/muffler: 23.8 oz (674g)
Includes: muffler, manifold, glow plug

Futaba® 4VF SkySport 4-Channel Radio

It offers FM signal clarity at an economical price, and is ergonomically designed for fatigue-free flying. Adjustable gimbals, mechanical trims and servo reversing, full NiCds and a charger are just a few of the 4VF's valuable features, and a trainer system is built in that's compatible with all Futaba FM systems. Comes with an R127DF receiver and four S3004 ball bearing servos. **FUTJ49****

Scale Accessories

For the ultimate in authenticity, enhance your S.E.5a model with scale touches from Williams Brothers. Duplicate the plane shown on the reverse side with this pilot figure, machine gun and wheels.
