# Yak 54

Almost-Ready-to-Fly EP Foam Aerobat

## **EXTREME LIGHT WEIGHT — FOR EXTREME AEROBATICS!**

With an average flying weight of just over 6 ounces, the Yak 54 is designed for totally “out there” aerobatics — and without any modifications. Add to that a high level of prefabrication and superior foam construction and you have a 3D indoor ace with no equals!

- ◆ *Flight-ready in just 2-3 hours.*
- ◆ *Capable of any unlimited maneuver imaginable.*
- ◆ *Great Planes' very own Yak design, and a favorite with Team Futaba® pilots.*

For more information and the location of the dealer nearest you, visit [electrifly.com](http://electrifly.com) or call 1-800-682-8948 and mention code number 99K39.

*Made from 3 mm extruded polystyrene*

**PRO-FORMANCE™ FOAM**

*An ElectriFly™ exclusive — and the top choice for feather-light, arrow-straight and super-strong airframes!*

GPMA1131

Wingspan: 32 in (820 mm)

Wing Area: 270 in<sup>2</sup> (17.4 dm<sup>2</sup>)

Weight Range: 5.5-6.7 oz (155-190 g)

Wing Loading: 2.9-3.5 oz/ft<sup>2</sup> (9-11 g/dm<sup>2</sup>)

Length: 36.5 in (920 mm)

Requires: 4-channel radio w/3 micro servos, out-runner brushless motor, 8A brushless ESC, 7.4V 300mAh LiPo battery

# Yak 54

Almost-Ready-to-Fly EP Foam Aerobat

Carbon fiber and laser-cut hardware help speed assembly, and the trim scheme is printed on. All control surfaces are beveled and pre-hinged with genuine 3M® Blendederm® tape.

3M® and Blendederm® are registered trademarks of the Minnesota Mining and Manufacturing Company.

ElectriFly's RimFire™ 250 out-runner brushless motor provides plenty of power for putting the Yak 54 through its paces.

With minimum throws the Yak 54 is a graceful sport flyer; maximizing the throws shows this plane's wild side, with the capability for unlimited 3D moves.

The Yak 54's compact wingspan and light weight makes it nimble and easy to fly in even the smallest indoor flying sites, and the colorful graphics are highly visible from any angle.
