

FOKKER D.VII

Electric-Powered Sport Scale ARF

A FAMOUS WWI FIGHTER — NOW AN ALL-WOOD ARF.

Just like the full-size Fokker D.VII that was the nemesis of Allied air forces in WWI, this prebuilt park flyer is a spirited performer. Sized for easy transport, it utilizes brushless motor power that allows for long flight times and exceptional maneuverability. And because the Fokker D.VII park flyer is an ARF, the high-quality, laser-cut wood parts assemble quickly and easily.

- *The prebuilt balsa/ply structures are precovered in a high-quality film.*
- *Lots of impressive details are evident, from the vacuum-formed cowl and realistic machine guns to the scale-shaped landing gear and scale wheels.*
- *The cabanes and interplane struts come already painted, and are shaped for easy installation and proper alignment.*

You don't find many park flyer-size wood electric ARF models of WWI aircraft — and none can match the design expertise that gives ElectriFly's lightweight, built-up balsa/ply Fokker D.VII its outstanding flight performance.

An out-runner brushless motor gives this model a great power-to-weight ratio and long flight times. The ElectriFly Rimfire 28-30-950 kV motor (GPMG4560) was found to be ideal for the Fokker D.VII.

“Our Fokker D.VII combines traditional wood construction with a design that's optimized for brushless motor power. It's simple to build, easy to repair, and a timeless performer.”

Great Planes Model Manufacturing

GPMA1141 • Wingspan: 36 in (914 mm) • Wing Area: 360 in² (23.2 dm²) • Weight: 25.7 oz (730 g)
Wing Loading: 10 oz/ft² (30 g/dm²) • Length: 27 in (685 mm) • Requires: 4-channel radio w/4 Futaba[®]
S3107 micro servos, ElectriFly Rimfire[™] 28-30-950 brushless motor, ElectriFly Silver Series SS-25
brushless ESC, ElectriFly 1250mAh LiPo battery, LiPo-compatible charger

For more information or the location of the dealer nearest you, visit www.electrifly.com or call 1-800-682-8948 and mention code number 99W34.

The prebuilt main structures are covered in high-quality film. For impressive detail, Great Planes supplies ready-to-install struts and cabanes, cowling and realistic machine guns and wheels.

With the Fokker D.VII, you get a complete package of well-made hardware that's specifically designed for light weight and precise control response.

You can access your LiPo flight battery quickly by removing the magnetically secured, easy-access hatch.

There are lots of ready-to-admire details on this model, including the vacuum-formed canopy with louvers, machine gun and scale-shaped landing gear and lightweight scale wheels.

RECOMMENDED ELECTRIFLY ACCESSORIES FOR YOUR FOKKER D.VII:

Silver Series SS-25 Electronic Speed Control (GPMM1820)

1250mAh 11.1V 3-Series LiPo Battery Pack (GPMP0823)

RimFire™ 28-30-950 kV Brushless Motor (GPMG4560)

PolyCharge 4™ (GPMM3015)

Triton2™ DC Peak Charger (GPMM3153)
