

SOPWITH CAMEL

Almost-Ready-to-Fly Electric Sport-Scale WWI Fighter

Britain's Front-Line Fighter has Returned...

...and ElectriFly has made it worth the wait. The Sopwith Camel EP ARF can be flight-ready in just 6-8 hours, thanks to built-up, MonoKote-covered balsa structures. Its scale details and factory-applied decals are sure to please WWI enthusiasts and sport pilots alike. And best of all, the Camel's compact size makes it easy to transport to your favorite field or park. Fly a classic front-line fighter today with the Sopwith Camel ARF – only from ElectriFly.

GPMA1144

Wingspan: 35.5 in (900 mm)

Wing Area: 389 in² (25.1 dm²)

Weight: 21.1 – 26.3 oz (595 – 745 g)

Wing Loading: 7.8 – 9.7 oz/ft² (24 – 30 g/dm²)

Length: 25 in (630 mm)

Requires: 4-channel radio w/4 micro servos, 950kV out-runner brushless motor, 25A brushless ESC (min.) & 11.1V 1500mAh LiPo battery. See back side for recommended products.

With its authentic WWI trim scheme and stable flying characteristics, the Sopwith Camel ARF is the perfect wingman for the ElectriFly S.E.5a ARF.

EXPERTLY COVERED WITH

A realistic replica engine adds authentic detail and exceptional scale looks, as does a painted pilot figure – a must-have for any WWI enthusiast!

Recommended Accessories

ElectriFly BP Series 11.1V 1500mAh LiPo Battery

Dogfighting requires power, and this handy LiPo pack ensures you get every last mA. Balancing allows each cell to fully charge to 4.2V, and a 15C continuous discharge rate helps keep you airborne longer. Includes a standard balancing connector and a Deans® Ultra Plug® connector. Requires balancing LiPo charger. **GPMP0717**

ElectriFly Silver Series 25A Brushless ESC

The SS-25 arrives with Deans battery, universal radio and gold-plated motor bullet plugs installed, for immediate plug-n-play fun! Ideal with NiCd, NiMH and LiPo cells, it detects pack voltage at hook-up and sets the auto cut-off automatically. Throttle response is incredibly smooth and virtually instantaneous, and brake can be turned on or off. A hefty 5V/2A BEC provides plentiful power for digital servos or extra servos. Weight 0.92 oz. (26 g). **GPMM1820**

Futaba® S3114 Micro High-Torque Servo

Ultra-light and installation-ready, the S3114 is ideal for applications that require micro size and macro muscle. With 4.8V power, it can deliver 19 oz.-in. of torque in 0.11 seconds. Switch to a 5-cell pack, and torque rises to 23 oz.-in. while speed accelerates to 0.09 sec/60°. 1-year limited warranty. **FUTM0414**

The ElectriFly Sopwith Camel ARF has a compact size that lets you take it virtually anywhere, whether it's your favorite field or the local park. It doesn't matter if you're a beginner or a pro, the Camel is a great way to fly away an afternoon.

ElectriFly RimFire™ 400 Out-runner Brushless Motor

Designed for explosive acceleration and maximum torque, the RimFire 400 is virtually maintenance-free, with no comms or brushes to wear out. Improved cooling helps it deliver 50% more power than other comparably sized out-runner motors. The lightened aluminum can houses rare earth Neodymium magnets for high torque, as well as double-shielded bearings. 2-year quality guarantee. **GPMG4560**

Futaba 7C 2.4GHz Radio System

Enjoy FASST™ benefits with your Sopwith Camel EP ARF! Painted Pre-Vision™ scans signals ahead of time – correcting errors before they become problems. Easy Link™ helps you “lock” your receiver to your transmitter’s coded signal and blocks out all others – just by touching a button. Dual Antenna Diversity assures the clearest reception, while Continuous Channel Shifting eliminates interference. 1-year limited warranty. **FUTK7000**
