

## SEA SCOUT™ MICRO R/C SUBMARINE RTR

**GO DEEP**  
WITH SUBMERSIBLE R/C!

- Available on 27MHz (Black, HCAB0020) or 49MHz (Gray, HCAB0021)—two subs can dive and explore at the same time!
- 3-channel radio provides full-function control for dives, surfacing, and forward and reverse exploration.
- Sub includes three motors and a built-in NiMH battery that recharges in minutes on the supplied DC charger.

R/C goes "undersea"! Fully assembled and perfectly sized for small pools and aquariums, the ready-to-run Sea Scout takes radio-control below the water's surface — and does it so easily that even 8-year-olds can be the commander.

Each propeller is powered by its own motor. A third motor offers instant diving or surfacing ability — even straight up and down!

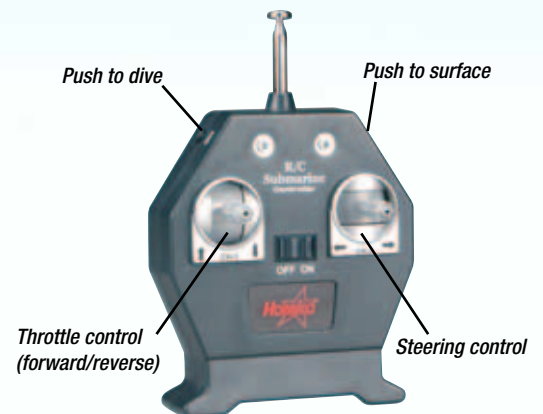

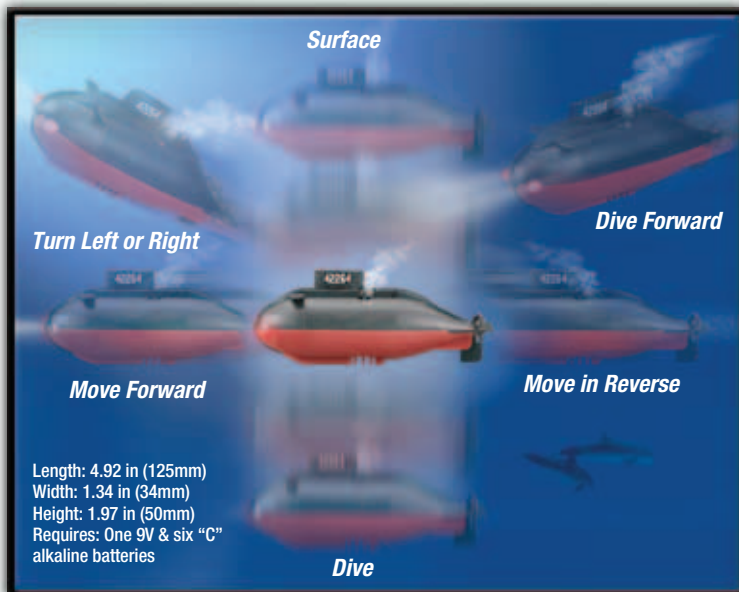

Working lights!

Recharge quickly for continuous dives.

Only 5" long!

For more information on the Sea Scout or the location of the dealer nearest you, please visit the Hobbico website at [www.hobbico.com](http://www.hobbico.com) or call 1-800-682-8948 and mention code number 99G28.

## MORE CHOICES IN READY-TO-GO R/C!

### Radio-Control, Ready-to-Run Electric Vee

## REEFRACER™

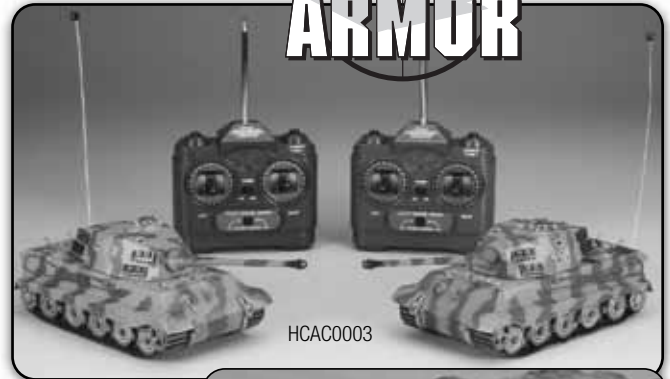

HCAB12\*\*

You don't need a lot of water — or building ability — to enjoy the Reef Racer! It comes already assembled and ready to go, complete with radio, motor...even an ESC. A preinstalled direct-drive system makes efficient use of the boat's powerful motor, and even at top speeds, the Reef Racer turns on a dime, making it perfect for small ponds and lakes. A self-righting hull enables it to "auto-recover" from rolls and flips for non-stop action. Choose from six different colors and frequencies.

### 1/35 Scale R/C Tank Set with Interactive Battle System

## COMBAT ARMOR™

HCAC0003

Combat Armor tanks capture the down-to-the-rivets detail of real King Tiger tanks, in the popular 1/35 static display size. But these machines take realism to the extreme, delivering exciting combat action through ready-to-run radio control! Combat Armor sets include two tanks and two controllers, for full-function R/C operation with synchronized action and sound. Dual motors power each model — one for each track, to maneuver just like a real tank. Requires one 9V and 6 "AA" batteries for each tank.

### Ready-to-Fly Electric Radio-Control Airplane

## SKY SCREAMER™

HCAA2014

Every pilot is a beginner at some point, and the Sky Screamer is a great place to start. Everything (except 8 "AA" and 6 "D" batteries) is included. Twin motors and advanced electronics provide lift, turning power and stability. A NiMH battery provides power for extended flights. A 20-minute charger and 2-stick radio are supplied, along with an extra wing, tail set, and two spare props. The package also includes an instructional DVD, nut driver and screwdriver. Spans 27.5 inches.

### Ready-to-Fly, Radio-Controlled Electric Park Flyer

## MICRO ULTRIX™

HCAA1994

It's the easiest AND most affordable way to fly R/C! Completely assembled out of the box, the 15.8" span Micro Ultrix also includes everything needed for flight except one 9V and six "C" batteries. Twin motors provide efficient power and easy steering; the included NiMH on-board battery offers long flight times and recharges in minutes using the supplied field charger. Ideal for small-field flying, the Micro Ultrix has a durable carbon fiber boom, ABS pod fuselage, and light, tough foam wing and tail.
