

## AXE™ EZ

**EASY TO FLY, WITH  
COUNTER ROTATING BLADES**

Ready-to-Fly Electric-Powered R/C Helicopter

### The heli virtually anyone can fly!

Whether you're young or old, you can be hovering the AXE EZ just minutes after you take it out of the box — no previous flying experience necessary! It's ideal for the beginner wanting to get into R/C helis, and experienced pilots will appreciate it as a change of pace for indoor fun. The AXE EZ is a real radio control heli — that just happens to be real easy to fly!

- Comes prebuilt and complete, so you can start flying right away.
- Lightweight and durably designed for hours of indoor flying fun.
- So easy, even a beginner can fly and hover like a pro in no time.

**The 4-channel Tactic radio is light, comfortable, easy to control and loaded with features:**

- Servo reversing
- Trims
- Battery LED
- Trainer system (trainer cord required)
- Charge jack\*

\*for use with optional NiCd batteries.

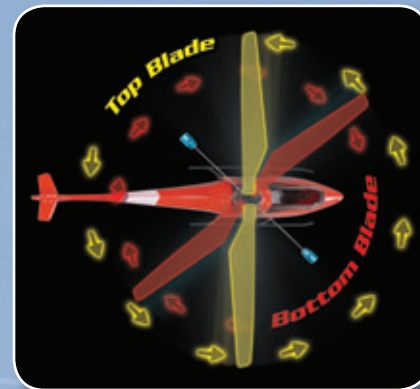

#### THREE DOZEN color/trim scheme options!

The AXE EZ is available in six colors — and each comes with decals for creating any one of six different looks, from military machines to a "TV News" or "Police" chopper! Each color has its own 72MHz frequency, so you and up to five of your friends can fly AXE EZ helis at the same time!

Besides nearly all of the components being already installed, the AXE EZ comes with everything you see here — including spare rotor blades and landing skids — for the ultimate in convenience!

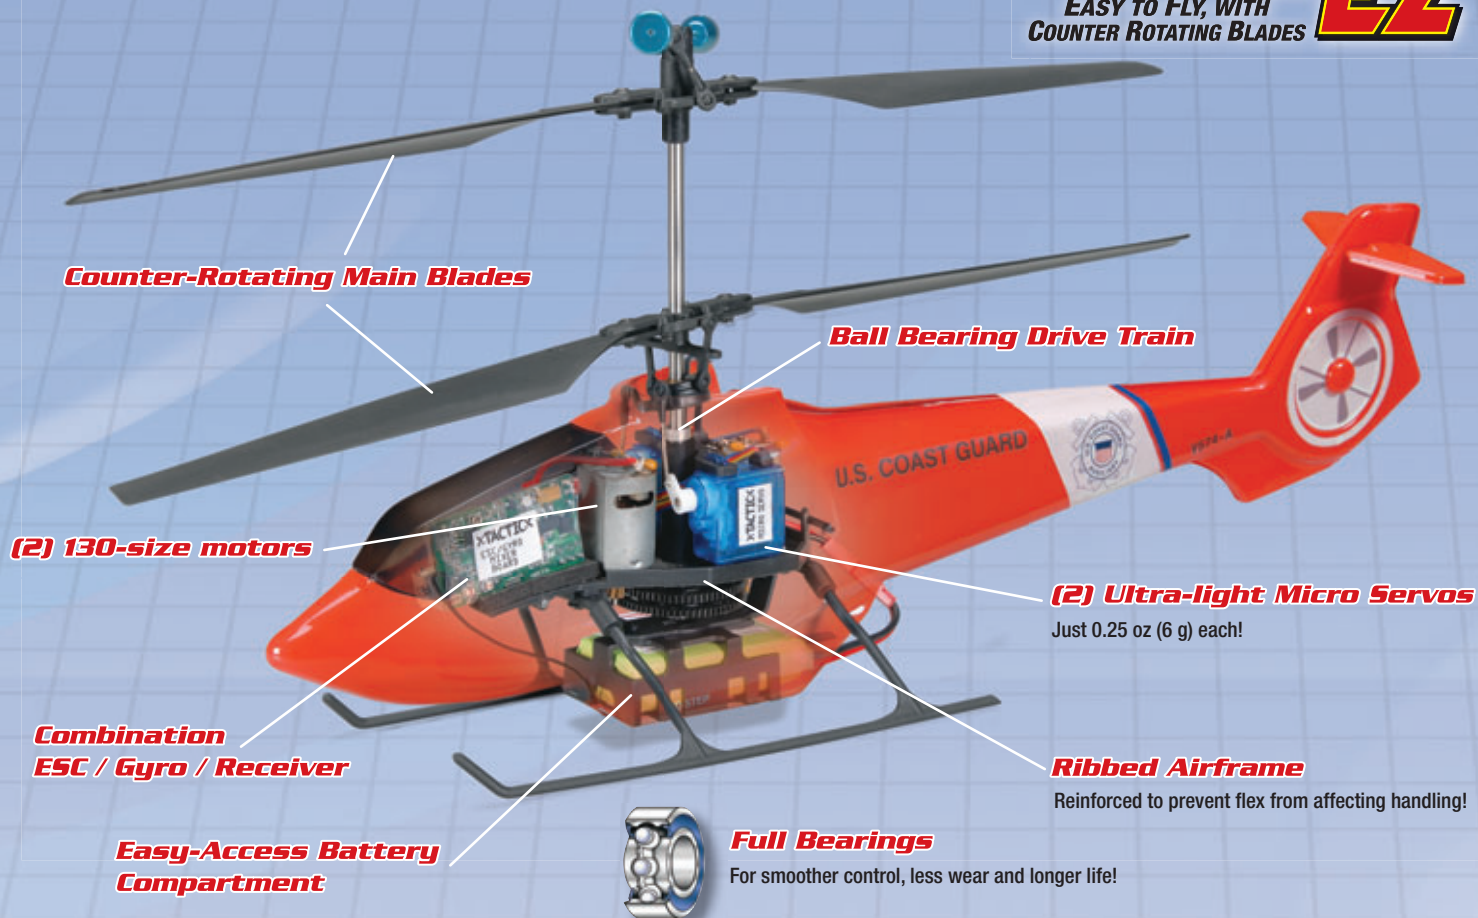

**The secret to its stable hovering is in the twin counter-rotating blades:**

The dual blades rotating in opposite directions at the same speed cancel out each other's torque. That means zero tendency to spin, for smooth, successful heli flights — from the very first time out!

# Heli-Max™

"High-quality, competitively priced R/C helicopters and accessories."

**AXE™**  
**EZ**  
 EASY TO FLY, WITH  
 COUNTER ROTATING BLADES

No high-maintenance parts here!  
 Construction is simple and sturdy, from the swash plate to the landing gear.

The electronics responsible for controlling speed and keeping the AXE EZ level are dependable, protected — and preinstalled.

Positioned for in-flight stability and easy access, the 800mAh LiPo battery pack is good for 10-15 minutes of flight per charge.

## Replacement Parts

All AXE EZ parts are available separately, so you can get exactly the parts you need!

HMXE7202	Battery Box Support Axe EZ	HMXE8301	Lower Rotor Blade Axe EZ (2)	TACM0101	TSX101 Micro Servo	HMXE8904	Landing Skid Mounting Axe EZ (2)
