

EconoKOTE®

The #1 lightweight, low-heat covering.

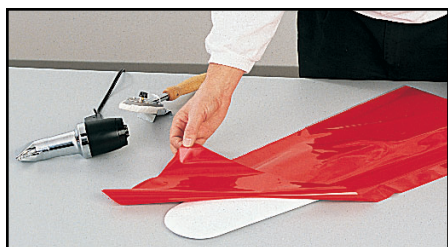

Ideal for use over foam, plastics, and fiberglass.

Perfect for park flyers!

Developed by the makers of MonoKote® covering, EconoKote® shrinks tight with low heat — so it's an excellent choice for covering foam, balsa sheeted foam, and most plastic or fiberglass parts. It's also perfect for placing trim on top of MonoKote-covered surfaces. Choose from ten colors, in 26" x 6' and 26" x 25' rolls. Each includes photo-illustrated instructions for easy application.

- Essential for models that require minimizing weight, such as compact park flyer electrics.
- Applies quickly and easily using a heat gun or sealing iron.
- Extra pliable — conforms readily to compound curves for a wrinkle-free finish.
- Puncture-resistant and easy to repair. Small "dents" disappear just by reheating!
- Allows easy cleanup of smudges or exhaust residue using detergent and water or Top Flite MonoKote Cleaner Polish.

Even with low heat, EconoKote is flexible and easy to apply — making it the best covering choice for foam wings.

A complete line of high-quality building accessories.

Heat Gun (TOPR2000)

Top Flite Heat Gun's 1000 watt rating provides plenty of power for drum-tight, scratch-free shrinking of any plastic covering. Also great for heat-shrink tubing and fast, dust-free drying of glues and paints. Includes a removable, flared nozzle for more directed coverage.

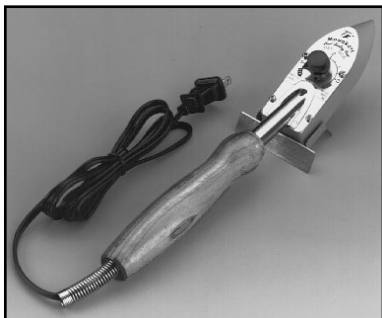

Trim Seal Tool (TOPR2200)

Top Flite Trim Seal Tool works great for hinge gaps, wing saddles, inside corners, intricate trim schemes and pinstriping. A high/low heat control adjusts to a wide range of coverings and an adjustable depth shoe helps fine-tune heat to the covering used.

Heat Sealing Iron (TOPR2100)

Top Flite Heat Sealing Iron features thermostat control for use with a wide variety of heat-activated films. A cone-shaped shoe with a flat sole plate easily smoothes solid surfaces and concave areas, while the pointed upswept tip reaches problem areas and prevents gouging.

Hot Sock™ (TOPR2175)

Affordable Top Flite Hot Sock offers an extra measure of protection against scratching and hazing of covering material and helps prolong the life of sealing iron shoes. Made of long-lasting 100% cotton, it ties on in seconds and is easy to use.

Hot Glove™ and Cool Hand™

Heat-resistant Thinsulate™ Hot Glove lets you touch covering while applying heat to tack, stretch and smooth. Cool Hand's five-fingered design with tiny vinyl "grabbers" gives you maximum control for manipulating heated film into place. One size fits all right and left hands.

Hot Glove™ TOPR2180

Cool Hand™ TOPR2182

Trim Solvent (TOPR6020)

Top Flite Trim Solvent makes MonoKote®-over-MonoKote applications mirror-smooth and wrinkle-free—no heat required. Modelers simply wipe on to clean, brush on to prep, place trim in position, squeegee away excess and polish to shine. Dries in just 24 hours.

MonoKote® Cleaner/Polish (TOPR2500)

Top Flite MonoKote Cleaner/Polish quickly removes smudges and fuel residue without scratching finish. Ideal for MonoKote coverings and almost any painted surface, it buffs to a high luster. Comes in a handy 8 oz. pump spray that fits easily in any flight box.

Smart Cut™ Trimming Tool (TOPR2400)

Top Flite Smart Cut lets modelers precisely trim MonoKote and other covering materials, leaving virtually invisible seams. A reversible spacer plate offers a choice of 1/8 in. or 1/16 in. spacing to ensure a consistent overlap. Lightweight, fiber-filled construction and molded-in finger grips offer comfort and control. Comes with two standard #11 hobby knife blades.

Builder's Cutting Mats

Protect your work surface – and the sharpness of your knife – with these 3-layered, reversible, self-closing cutting mats. All have standard and metric rules on two edges, plus angle guides, star templates and size charts for wood and dowels. The 18" x 24" mat adds a spec conversion chart, plus hardware, drill and tap information. Another, larger star template and measurement conversion chart can be found on the 24" x 36" mat.
