This software update adds or changes the following functions. In addition to the manual originally supplied with your system, please now refer to the following new instructions:

The GYRO2/GYRO3 function can now be set with a helicopter. (Helicopter)

* When using the gyro2/gyro3 function, assign gyro2/gyro3 to any channel on the function screen.

1) When Gyro setting menu is chosen, the rate setting screen of each gyro is displayed.
   * A rate and the AVCS mode setting of each gyro are possible with this screen.

2) When a gyro function button is chosen, the detailed setting screen of each gyro is displayed.

   ![Gyro Setting Screen Example]

A function which turns off the buzzer has been added. (All model types)

1) Turn the buzzer ON/OFF at the sound screen in the system menu.
   *When “WARNING” is set to OFF, the no operation alarm (30 minutes), mixing warning alarm, backup error alarm and low battery alarm sounds are turned OFF.

2) The first page sets an elevator, and the second page sets an ELE to CAMBER, and the third page is AILERON to RUDDER setting.

   ![Sound Setting Screen Example]

Servo test

Servo test cannot now turn on in the next state, because it is dangerous for the throttle to suddenly become engaged.

- Throttle cut is on. [Airplane/Helicopter]
- Throttle hold is on. [Helicopter]
- Condition hold is on. [Helicopter]

Acceleration setting can be performed at elevator, ELE to CAMBER and AILERON to RUDDER. (Glider)

*This setting is divided into elevator setting, elevator to camber setting, and aileron to rudder setting. The setting method is the same.

*Function ON/OFF switch setting is performed for AILERON to RUDDER setting only.
